

Inspiration 7.0 and unitedstreaming Clips

This tutorial was made using Macintosh OS X, Inspiration 7.0, Microsoft 2000 OS, Windows Media Player 7.1, and QuickTime Player 6.

To link to unitedstreaming Windows Media Player and QuickTime clips in your Inspiration 7.0 project, follow the steps below.

1. Highlight your idea bubble by clicking once on it.

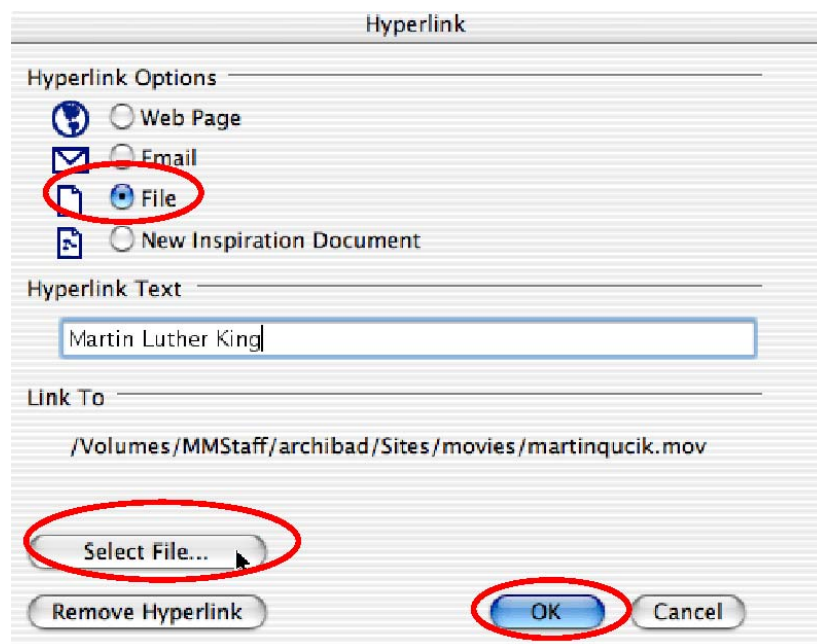

2. Click "Hyperlink."

3. Select "File."

4. Navigate to your downloaded *unitedstreaming* video clip.

Note: Macintosh will only recognize QT files. PCs, however, will recognize Windows Media Player AND QuickTime files.

5. Click "ok."

6. To test your link: click the hyperlink indicated with text that is blue/purple and underlined.
